SUMMARY: Creative and hands-on student passionate about design, technology, and community service. Experienced in 3D printing, digital modeling, coding in Python, volunteering, and collaborative projects. Enjoys exploring ideas through art, UI/UX design, and community service projects.

EDUCATION

Oakland High School (OHS)

Oakland, CA

High School Diploma, Innovative Design and Engineering Academy (IDEA)

Expected Graduation: 05/2027

- Relevant Courses: AP Computer Science, AP Statistics, Algebra 1, Algebra 2, Geometry, Math Analysis, Chemistry, Physics, Engineering

EXPERIENCE

Hack the Hood, BuildAI Internship Program

06/2026 - 08/2026

- Completed a 12 week virtual program based on the topic of AI for 2-4 hours each week
- Contributed in small groups also known as tiger teams to work on projects together along with the instructors
- Learned fundamental concepts about the usage of AI during lectures and knowing the different ways it can help or harm us depending on the way it's used

Girls Who Code, Pathways Summer Program

06/2026 - 08/2026

- Completed a 7 week virtual program without instructors and lectures
- Worked on projects and assignments individually with the pace I'm comfortable with
- Learned more coding concepts by watching videos and following along with the process

Girls Who Code, Summer Immersion Program

07/2025 - 08/2025

- Completed a two-week virtual program focused on game design and interactive media development.
- Learned fundamental coding concepts while designing games for everyone to try out and creating digital projects individually on a website called Replit.
- Participated in mentorship sessions with industry professionals to explore careers in tech, design, and creative industries.
- Practiced teamwork & presentation skills by sharing final projects with peers and instructors and getting feedback from them.

Volunteer, Asian Immigrant Women Advocate (AIWA), Oakland, CA

03/2025 - 04/2025

- Organized campaigns to fight for better living & working conditions for low-income immigrants
- Member of Youth Build Immigrant Power (YBIP) and helped provide assistance to students and new immigrant women workers, including fundraising for free English and labor rights workshops

TECHNICAL PROJECTS

3D Printing Project

- Worked in a team to design a toy using OnShape, a 3D modeling software. Choose a fish-shaped model and iterated on the design through digital drafts and adjustments.
- Finalized the design for 3D printing by refining its shape and structure to ensure it met the intended visual and functional goals before printing.

Mini Game and Story Animation on Scratch (MIT)

- Created a game called "Catch a Ball" where a bowl is used to catch the ball and users use the arrow keys to move the bowl with various backgrounds.
- Brainstormed a story with dialogues and unrealistic characters interacting with each other where they happen to meet at a variety of scenarios with different background noises once they move or do an action.

Mobile App UI Design using Figma

- Worked on an animal app based on cats called Cozycats, where users can navigate to different tabs and book someone to take care of their cat while they're away.
- Designed a dog app called Dog Fetcher, where people can find their lost dog as quickly as possible by navigating to specific tabs and book a fetcher that they prefer.

SKILLS

- **Software & Tools:** Microsoft Suite, Google Suite, Figma, Scratch (MIT), Adobe Lightroom
- **Languages:** Python, Java, Typescript, JavaScript, English, Chinese
- **Engineering & Design:** 3D printing, basic woodworking, creative prototyping, hand crafting, game design

CERTIFICATIONS

- Google UX Design Professional Certificate — Coursera
- UI/UX Design Specialization — California Institute of the Arts (CalArts), Coursera
